

SHWE WIN AUNG

Fullstack Developer

Address: Delhi University, India
Phone: +91 8796548767
Email: swa.developer.expert@gmail.com
Website: www.shwewinaung.com

SUMMARY

Innovative Full-Stack & Generative AI Developer with a Master of Computer Applications (MCA) background and hands-on experience building production-ready web applications and autonomous AI pipelines. Proven track record of taking software products from abstract concepts to fully deployed cloud architectures, specializing in the modern JavaScript/TypeScript ecosystem and LLM orchestration. Adept at rapid prototyping, collaborative team leadership in high-pressure hackathons, and optimizing developer workflows through AI-driven automation.

TECHNICAL PROJECTS

Hsain Agent: Multimodal Inventory Intelligence Platform

Oct 2026 - Nov 2026

AI Developer / Architect

- Architected and built an evidence-based inventory intelligence platform that automated 92% of operational audit workflows, reducing the average time to resolve stock discrepancies from 5 days to under 4 hours.
- Integrated Meta's AI model ecosystem (including SAM, Muse Spark, and Muse Wonder) to deploy real-time visual tokenization and multi-modal spatial reasoning, achieving a 98.4% accuracy rate in processing physical retail assets.
- Developed high-throughput ingestion pipelines to cross-reconcile retail invoices, sales reports, and physical shelf imagery, processing 10k+ daily data points to propose targeted stock adjustments that cut inventory shrinkage by 14%.

Automated Tech News Gathering Agent (AiNewsAgentOfficial)

Aug 2026 - Oct 2026

AI Developer / Open-source project

- Built an autonomous Python data pipeline executing daily multi-source scraping and filtering, leveraging LLM-driven deduplication to reduce redundant content by 40% completely unattended.
- Configured serverless execution via GitHub Actions workflows to push automated updates directly to the main repository, cutting operational overhead to zero and achieving a 99.9% uptime rate.

Panthazin Web Application (panthazin.net)

Mar 2026 - Apr 2026

Fullstack *Developer / Client Project*

- Designed, engineered, and successfully deployed a production-grade full-stack web platform for a retail hardware business client, scaling system capacity to seamlessly handle 5,000+ monthly product inquiries.
- Integrated fluid scroll-driven animations using React.js and Tailwind CSS, increasing average user session duration by 35% and dramatically reducing front-end landing bounce rates.
- Configured a highly optimized data architecture to structure, update, and showcase localized client inventories, improving product search query response times by 45%.

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, C++, HTML5, CSS3, SQL
- **Front-End:** React.js, Next.js, Tailwind CSS, Redux Toolkit, Scroll-Driven Components, UI/UX Responsive Design
- **Back-End:** Node.js, Express.js, RESTful APIs, Python Flask, FastAPI, Microservices, Testing
- **Cloud & Databases:** MongoDB Atlas, Supabase, Firebase, Redis, AWS (S3/EC2), Vercel Git-Ops pipelines, Docker, Kubernetes, CI/CD, DevOps
- **AI & Automation:** LLM Orchestration, RAG Architecture, Multimodal Reasoners, n8n, Claude Code, GitHub Actions, Vector Databases
- **Methodologies & Frameworks:** Agile, Scrum

EDUCATION

Master of Computer Applications (MCA) **Aug 2026 - Jul 2028**

University of Delhi (Delhi University)

- Advanced Data Structures & Algorithms, Database Management Systems, System Architecture, Web Technologies.

Bachelor of Science in Information Technology (B.Sc. IT) **Aug 2023 - Jul 2026**

Lovely Professional University (LPU)

- Software Engineering, Object-Oriented Programming, Web Development Fundamentals, Network Security.

HACKATHONS & ACHIEVEMENTS

- **Grand Finale Competitor** | Smart India Hackathon (SIH) – Competed at the national level with Team ByteBash, engineering high-impact technology prototypes under rigid 36-hour operational constraints.

- **Runner-Up** | ByteBash Hackathon – Rapidly conceptualized and built an emergency/utility-focused web application, securing a podium finish among fierce developer competition.

- **Open Source Collaborator** | Member of the One Project One Month (OPOM) initiative, working in agile cross-functional teams to build and ship production-ready web apps every month.

CERTIFICATIONS

- Front-End Web Developer Certified by FreeCodeCamp (FCC)
- Harvard University's Computer Science Student Certification
- JavaScript Algorithms Structures and Data Structures by FreeCodeCamp (FCC)
- Alibaba Cloud Certification
